

# We have a Dream.<sup>TM</sup>

The one every regulatory affairs department should have:

- Hassle free, successfully handled rate cases.
- Timely completion of consistent and accurate filings.
- Ability to archive and retrieve every case detail.

## Welcome to the new world of rate case management.

The Dream<sup>TM</sup> system is a centralized electronic "Rate Case Management" system specifically designed for regulated utilities. It provides a platform for all parties involved in the regulatory filing process to efficiently collaborate on formulating appropriate responses and streamlines the response process.

The Dream<sup>TM</sup> system dramatically reduces the time to deliver responses for regulatory filings while increasing accuracy and consistency. Using the Dream<sup>TM</sup> system significantly improves regulatory data management by giving managers total control and oversight in the preparation of regulatory filings. By creating a comprehensive data repository that is fully searchable, it provides an institutional memory in the long run. Finding what you are looking for has never been easier.

### The Dream<sup>TM</sup> system is a powerful management tool.

- It provides real-time progress reports of regulatory filings.
- A centralized system allows for easier management and tracking of data request responses, and retrieval of all regulatory filings.

### The Dream<sup>TM</sup> system is easy to use.

- Users can be trained in hours, not days or weeks.
- Access within your company network or over the Internet.

### The Dream<sup>TM</sup> system is cost efficient.

- Ease of deployment, maintenance and training keeps system costs at the lowest levels possible.
- Fully searchable data entries and document attachments reduce the costs of storage and retrieval of historical filings.

If you would like to test the Dream<sup>TM</sup> system and learn more about its benefits to your organization, contact us at
